## **Pricing Document (incorporating SFIA rate card)**

Framework Reference: RM1557.13

**May 2022**

# Pricing

Our fees are presented in accordance with SFIA categories applicable to experience levels and categories of service for which we have published our day-rates.

EY's cloud services are predominantly based on a unit of a resource-day and we may reduce these rates by mutual agreement for specific call-off agreements. Factors affecting these variations may include the ability to perform services using off-shore or near-shore resources, both of which would enable us to reduce day rates. Our intent has been to present our pricing arrangements transparently and we have therefore presented a rate card which reflects the delivery of services using UK based resources.

In addition to standard day-rate traditional models we are prepared to adopt commercial models which offer additional value and incentives. This enhanced commercial offer, linking payment to the value that we create is aligned with EY's global strategy, but also with the G-Cloud objectives that services should be paid for, based on the outcomes that they achieve. Some of the models that we would consider with you are:

- **Risk/Reward:** Our fees are directly related to the realisation of benefits or savings by you as the contracting authority. Our fees will be lower if the agreed benefits aren't realised, but higher if together we over-achieve targets.
- **Contingent Fee:** In which a percentage of our fee is withheld pending satisfactory achievement of milestones.
- **Balanced Scorecard:** In which a proportion of our fee is dependent upon achievement of satisfactory performance against a balanced scorecard.
- **Fixed Price:** In which we agree a fixed fee for defined deliverables and/or outcomes. We will assess the risk profile of work contracted on this basis and may elect to add a premium to fixed price fees.

Discounts may be available through any of these commercial arrangements and will be considered on a case-by-case basis with buyers during the procurement process.
